

Wednesday November 29

11:45	Bus pick-up at Gothenburg central station with lunch sandwich on the bus. (Night train from Umeå arrives at 11.30)			
14:00	Arrival at Tjärnö			
14:15	Welcome and opening			
14:20	Plenary 1	Marie	Stenseke	From ecosystem services to Nature's contributions to people (40 min)
15:00	BREAK			
15:10	Presentation 1	Milena	Arias Schreiber	Clearing the path towards a shift to an Ecosystem-based fisheries management acknowledging social and political repercussions in Sweden
15:30	Presentation 2	Neva	Leposa	Why marine governance matters? The MSFD framing of human-sea relations in Sweden
15:50	Coffee & cake (time to put up posters)			
16:20	Presentation 3	Friederike	Ziegler	The Skagerrak shrimp fishery- how sustainable is it?
16:40	Presentation 4	Andrea	Morf	Challenges and Enablers for Transboundary Integration in Marine Spatial Planning - The multidimensional integration puzzle in the Sound between Denmark and Sweden
17:00	Presentation 5	Phillip	Orlale	Spatial and temporal dynamics of land-sea continuum and their implications to integrated marine spatial planning in Kenya
17:20	Snacks and poster presentations			
19:00	Dinner served from 19:00			

Thursday November 30

08:30	Dyrssen Award Winner presentations			
08:40	Presentation 6	Kristina	von Schreeb	Master thesis winner 2016 Mapping coastal biotopes and resource use in Zanzibar, Tanzania
09:00	Presentation 7	Gabriel	West	Master thesis winner 2017 An independently dated 4200-year palaeomagnetic secular variation record from the Chukchi Sea, Arctic
09:20	BREAK			
09:30	Presentation 8	Ellika	Faust	Bachelor thesis winner 2016 How the Pacific oyster came to Sweden
09:50	Presentation 9	Carl	Tamario	Bachelor thesis winner 2017 Variation in embryonic salinity tolerance in two anadromous subpopulations of northern Pike <i>Esox lucius</i> L.
10:10	Coffee & fruit			
10:40	Plenary 2	Sverker	Jagers	Why we should not trust in voluntary action when it comes to marine challenges (40 min)
11:20	Presentation 10	Linda	Karlsson Hammarfelt	Baltic Islands as Sites of Refuge. Flight Scenarios and Insularity in Contemporary Literature
11:40	Lunch			
12:40	Plenary 3	Martin	Visbeck	Global de-oxygenation and challenges with changing oceans. (40 min)
13:20	Presentation 11	Jonas	Hentati Sundberg	Path dependency in social-ecological systems: Swedish fisheries policy, subsidies, and 100 years of over-fishing
13:40	Presentation 12	Kerstin	Johannesson	Management of genetic biodiversity - why and how?
14:00	BREAK			
14:10	Presentation 13	Johan	Wikner	Temperature, DOC level and basin interactions explain the declining oxygen concentrations in the Bothnian Sea
14:30	Presentation 14	Astrid	Hylén	Onset of benthic nitrate reduction processes following natural oxygenation of long-term anoxic bottoms
14:50	Presentation 15	Moa	Edman	Nutrient retention along the Swedish coastline
15:10	Coffee & cake			
15:30	Catching the daylight / social activity			
16:30	Presentation 16	Madeleine	Nilsson	Benthic recycling of organic carbon on a basin-wide scale in the Baltic Sea - in situ studies across physical and biogeochemical gradients
16:50	Presentation 17	Kevin	Vikström	Measuring maintenance respiration and its' effect on bacterial growth efficiency in a sub-arctic estuary
17:10	Presentation 18	Anders	Andersson	Microbial ecology of the Baltic Sea: From community to population structure
17:30	End of day 2			
17:45	Annual meeting SHF	The annual meeting for the Swedish Marine Science Association (SHF) is open to all, but only members are allowed to vote.		
19:00	Conference dinner			

Friday December 1

08:30	Presentation 19	Mats	Tysklind	Pharmaceuticals in Swedish Marine Waters
08:50	Presentation 20	Darya	Kupryianchyk	What controls fate of POPs in fiber banks sediments? Studying sediment-water-biota exchange of POPs in fiber banks sediments in the northern Baltic Sea
09:10	Presentation 21	Mats	Lindgarth	Assessment of ecological status in Swedish coastal waters:
09:30	Presentation 22	Terry	Bidleman	What Goes Around Comes Around: The Sea-Land-Sea Cycle of Algal-Produced Bromoanisoles
09:50	Coffee & fruit			
10:20	Panel discussion with all Keynote speakers led by Lena Gipperth		Current trends and future challenges in marine science	
11:20	End of conference			
12:00	Bus to Gothenburg	ETA in Gothenburg 14:20. Trains to Sthlm at 14.25 and 15.25.		

Poster presentations

Poster 1	Kajsa	Tönnesson	Havet 1988
Poster 2	Caroline	Raymond	Succession in presence of the invasive polychaete <i>Marenzelleria</i> spp. compared to the native clam <i>Macoma balthica</i> in the Baltic Sea
Poster 3	David	Turner	The potential future contribution of shipping to acidification of the Baltic Sea
Poster 4	Christian	Sommer	Major Baltic Sea Inflow event and Baltic Sea sediment bacterial community structure response
Poster 5	Julian Alberto	Gallego Urrea	Modelling the kinetics of oxidation-reduction reactions of iron in marine environments
Poster 6	Tina	Elfwing	R/V Electra - new possibilities for research
Poster 7	Ellen	Schagerström	Intriguing behaviour in <i>Littorina</i> species promotes the survival of juvenile snail.
Poster 8	Elin	Almroth-Rosell	Quantification of the impact of benthos for the coastal filter using two mechanistic models in the Roskilde Fjord
Poster 9	Lena	Kautsky	Assessing ecological status in Swedish coastal waters using macroalgal species as indicators
Poster 10	Stina	Lindqvist	Role of benthic primary production and nitrogen cycling in shallow-water illuminated sediment systems
Poster 11	Per	Hall	Benthic Recycling of Biogenic Silica Along Depth and Salinity Gradients in the Baltic Sea System
Poster 12	Martin	Larsvik	Nya Skagerak
Poster 13	Amanda	Nylund	Effects of ship induced vertical mixing in ship lanes
